Aurascope

HIGH FIDELITY PROTOTYPE READ ME

How to Use

Download Expo Go on your mobile phone. Create an account and log in. Open your camera app and scan the QR code below, which will redirect you to the Expo Go app, which will load the High Fidelity Aurascope Prototype.

Limitations

As this is still a prototype, some functionalities are limited. These include:

- Although users can capture media, they can only use the hard coded media to generate new moodboards, not their newly captured media
- Users cannot edit their user profile
- Users cannot share mood boards with other collaborators
- Users cannot export mood boards as JPEG, PDF files or links
- Users cannot play back audio or video in their moodboards
